Level Beginner to Elementary (CEFR Level A1 to A2)

What do you know?

ACTIVITY NOTES

- Number of Players = three
- Approximate time = twenty minutes
- Provided Materials: One game board per group of three players; one set of 27 (cut-up) question cards – placed face-down on a desk
- Additional materials required = one die per group of three players; one board piece per player

Playing the Game

Players place their board pieces on the 'Start' square. The game begins with 'Player A' picking up a card from the pile and asking the question to 'Player B'.

'Player B' tries to answer the question using a complete, grammatically correct sentence (such as the ones provided on the bottom of each card). If 'Player B' is unable to do so, then he / she is not allowed to roll the die to move forward.

The game then continues with different players taking turns asking and answering questions.

Note that a player may move forward additional squares – or move backwards – if he / she lands on certain squares.

Winning the Game

A player may win the game by either one of two possible methods:

1. A player wins the game by being the first to arrive at the 'Finish' square.
2. A player may also win when all the cards have been used and he / she is ahead of the other players' pieces.

Thank you, Ingrid!
